Plant Science, 79 (1991) 265–267
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 79 (1991)

Acetohydroxyacid synthase, in vitro selection, mutant, herbicide resistance, sulfonylurea, adventitious bad regeneration, 77
Adventitious bud, fruit tree, 119
Adventitious bud regeneration, in vitro selection, mutant, herbicide resistance, sulfonylurea, acetohydroxyacid synthase, 77
Adventitious root formation, potassium, *Cucumis sativus* L., *Phaseolus radiatus* L., *Phaseolus vulgaris* L., 47
Agrobacterium rhizogenes, T-DNA, root-inducing genes, promoter activity, organ-specific expression, 69
Agrostis alba, DNA delivery, electroporation, silicon carbide fiber, wheat dwarf virus-derived plasmid, β-glucuronidase, 247
Agrostis alba L., embryogenic callus, thioproline, proline, 259
Alfalfa, somatic embryogenesis, regeneration, *Medicago*, citric acid, 181
Anoxia, rice, coleoptiles, ethylene, growth regulators, 57
Arabidopsis thaliana, tissue culture medium, light, *Lycopersicon esculentum*, *Daucus carota*, 253
Arachis hypogaea, lectin homology, nodule lectin, legume tissue lectins, 127
ATPase, *Avena sativa*, plasma membrane, senescence, sterols, 3
Auxin, *Brassica napus*, cytokinins, genic male sterility, regeneration, 95
Auxin, NADH oxidase, plant growth, triacontanol, 31
Auxotrophy, cell culture, *Datura*, kanamycin resistance, somatic hybrid, universal hybridizer, 111
Avena sativa, plasma membrane, senescence, sterols, ATPase, 3

Brassicaceae, cytoplasts, protoplast fusion, cybrids, 205
Brassica napus, auxin, cytokinins, genic male sterility, regeneration, 95

Ca^{2+}, *Petunia hybrida*, protein kinase, 3′,5′-cyclic AMP, 37
Calcium transport, mechanical stress, microsomes, calmodulin, plasma membrane, tonoplast, 23
Calmodulin, mechanical stress, microsomes, calcium transport, plasma membrane, tonoplast, 23
Cell culture, auxotrophy, *Datura*, kanamycin resistance, somatic hybrid, universal hybridizer, 111
Cell culture, somatic embryogenesis, histology, *Lycium chinensis*, 99
Chitosan, plant viruses, plant protection, protoplasts, 63
Citric acid, somatic embryogenesis, alfalfa, regeneration, *Medicago*, 181
Clonal propagation, desert teak, plantlet, *Tecomella undulata*, tissue culture, 217
Coleoptiles, rice, anoxia, ethylene, growth regulators, 57
Cotyledon callus, *Fusarium* wilt, *Cucumis melo* L., culture filtrates, 105
Cucumis melo L., *Fusarium* wilt, cotyledon callus, culture filtrates, 105
Cucumis sativus L., potassium, *Phaseolus radiatus* L., *Phaseolus vulgaris* L., adventitious root formation, 47
Culture filtrates, *Fusarium* wilt, *Cucumis melo* L., cotyledon callus, 105
Cuscuta japonica, flowering, haustorium, kinetin, successive culture, 241
Cybrids, cytoplasts, protoplast fusion, *Brassicaceae*, 205
3′,5′-Cyclic AMP, *Petunia hybrida*, protein kinase, Ca^{2+}, 37
Cytokinins, auxin, *Brassica napus*, genic male sterility, regeneration, 95
Cytokinin efficacy, *Rosmarinus officinalis*, inorganic salts, shoot bud differentiation, 229
Cytoplasts, protoplast fusion, cybrids, *Brassicaceae*, 205

Datura, auxotrophy, cell culture, kanamycin resistance, somatic hybrid, universal hybridizer, 111
Daucus carota, tissue culture medium, *Arabidopsis thaliana*, light, *Lycopersicon esculentum*, 253
Desert teak, clonal propagation, plantlet, *Tecomella undulata*, tissue culture, 217
DNA delivery, *Agrostis alba*, electroporation, silicon carbide fiber, wheat dwarf virus-derived plasmid, β-glucuronidase, 247

Electroporation, *Agrostis alba*, DNA delivery, silicon carbide fiber, wheat dwarf virus-derived plasmid, β-glucuronidase, 247
Embryogenic callus, *Agrostis alba* L., thioproline, proline, 259
EMS gamma rays, *Solanum melongena*, mutagenesis, lincomycin, 237
Enzyme accumulation, ribonucleotide reductase, *Euglena*, vitamin B_{12}, 149
Ethylene, rice, coleoptiles, anoxia, growth regulators, 57
Euglena, respiration rate, vitamin B_{12}, O_2 uptake, 143
Euglena, ribonucleotide reductase, enzyme accumulation, vitamin B_{12}, 149
Extensin, maize, hydroxyproline-rich glycoproteins, pericarp, plant cell walls, 13

Flowering, *Cuscuta japonica*, haustorium, kinetin, successive culture, 241
Fruit tree, adventitious bud, 119
Fumarase development, fumarase purification, lipid-storing seeds, mitochondrial biogenesis, seed germination, starch-storing seeds, 137
Fumarase purification, fumarase development, lipid-storing seeds, mitochondrial biogenesis, seed germination, starch-storing seeds, 137
Fusarium wilt, *Cucumis melo* L., cotyledon callus, culture filtrates, 105

Genic male sterility, auxin, *Brassica napus*, cytokinins, regeneration, 95
Germination, *Lens culinaris*, polyamines, plant stress, 51
Glucuronidase, transformation, somatic embryo, *Medicago sativa*, 223
β-Glucuronidase, *Agrostis alba*, DNA delivery, electroporation, silicon carbide fiber, wheat dwarf virus-derived plasmid, 247
Growth regulators, rice, coleoptiles, anoxia, ethylene, 57

H^+-ATPase, root membrane, sunflower, *Helianthus annuus*, mRNA assays, 163
Hairpin structures, mitochondrial DNA, plasmid-like DNAs, *Lupinus albus*, 173
Haustorium, *Cuscuta japonica*, flowering, kinetin, successive culture, 241
Helianthus annuus, root membrane, H^+-ATPase, sunflower, mRNA assays, 163
Helianthus annuus, sunflower, ubiquitin, transient expression, stress response, 87
Herbicide resistance, in vitro selection, mutant, sulfonylurea, acetohydroxyacid synthase, adventitious bud regeneration, 77
Histology, cell culture, somatic embryogenesis, *Lycium chinensis*, 99
Hydroxyproline-rich glycoproteins, extensin, maize, pericarp, plant cell walls, 13

Immunodetection, in vitro cell culture, membrane-bound activity, nitrate reductase, 193
Inorganic salts, *Rosmarinus officinalis*, cytokinin efficacy, shoot bud differentiation, 229
In vitro cell culture, immunodetection, membrane-bound activity, nitrate reductase, 193
In vitro selection, mutant, herbicide resistance, sulfonylurea, acetohydroxyacid synthase, adventitious bud regeneration, 77

Kanamycin resistance, auxotrophy, cell culture, *Datura*, somatic hybrid, universal hybridizer, 111
Kinetin, *Cuscuta japonica*, flowering, haustorium, successive culture, 241

Lectin homology, *Arachis hypogaea*, nodule lectin, legume tissue lectins, 127
Legume tissue lectins, *Arachis hypogaea*, lectin homology, nodule lectin, 127
Lens culinaris, germination, polyamines, plant stress, 51
Light, tissue culture medium, *Arabidopsis thaliana*, *Lycopersicon esculentum*, *Daucus carota*, 253
Lincomycin, *Solanum melongena*, mutagenesis, EMS gamma rays, 237
Lipid-storing seeds, fumarase development, fumarase purification, mitochondrial biogenesis, seed germination, starch-storing seeds, 137
Lupinus albus, mitochondrial DNA, plasmid-like DNAs, hairpin structures, 173
Lycium chinensis, cell culture, somatic embryogenesis, histology, 99
Lycopersicon esculentum, tissue culture medium, *Arabidopsis thaliana*, light, *Daucus carota*, 253

Maize, extensin, hydroxyproline-rich glycoproteins, pericarp, plant cell walls, 13
Mechanical stress, microsomes, calcium transport, calmodulin, plasma membrane, tonoplast, 23
Medicago, somatic embryogenesis, alfalfa, regeneration, citric acid, 181
Medicago sativa, transformation, somatic embryo, glucuronidase, 223
Membrane-bound activity, immunodetection, in vitro cell culture, nitrate reductase, 193
Microsomes, mechanical stress, calcium transport, calmodulin, plasma membrane, tonoplast, 23
Mitochondrial biogenesis, fumarase development, fumarase purification, lipid-storing seeds, seed germination, starch-storing seeds, 137
Mitochondrial DNA, plasmid-like DNAs, *Lupinus albus*, hairpin structures, 173
Molybdenum, soybean, photosynthesis, nitrogenase activity, sulphur dioxide, 157
mRNA assays, root membrane, H^+-ATPase, sunflower, *Helianthus annuus*, 163
Mutagenesis, *Solanum melongena*, EMS gamma rays, lincomycin, 237
Mutant, in vitro selection, herbicide resistance, sulfonylurea, acetohydroxyacid synthase, adventitious bud regeneration, 77

NADH oxidase, auxin, plant growth, triacontanol, 31
Nitrate reductase, immunodetection, in vitro cell culture, membrane-bound activity, 193
Nitrogenase activity, soybean, photosynthesis, sulphur dioxide, molybdenum, 157
Nodule lectin, *Arachis hypogaea*, lectin homology, legume tissue lectins, 127

O_2 uptake, respiration rate, vitamin B_{12}, *Euglena*, 143
Organ-specific expression, T-DNA, *Agrobacterium rhizogenes*, root-inducing genes, promoter activity, 69

Pericarp, extensin, maize, hydroxyproline-rich glycoproteins, plant cell walls, 13

Petunia hybrida, protein kinase, 3′,5′-cyclic AMP, Ca^{2+}, 37
Phaseolus radiatus L., potassium, *Cucumis sativus* L., *Phaseolus vulgaris* L., adventitious root formation, 47
Phaseolus vulgaris L., potassium, *Cucumis sativus* L., *Phaseolus radiatus* L., adventitious root formation, 47
Photosynthesis, soybean, nitrogenase activity, sulphur dioxide, molybdenum, 157
Plantlet, clonal propagation, desert teak, *Tecomella undulata*, tissue culture, 217
Plant cell walls, extensin, maize, hydroxyproline-rich glycoproteins, pericarp, 13
Plant growth, auxin, NADH oxidase, triacontanol, 31
Plant protection, chitosan, plant viruses, protoplasts, 63
Plant stress, *Lens culinaris*, germination, polyamines, 51
Plant viruses, chitosan, plant protection, protoplasts, 63
Plasma membrane, *Avena sativa*, senescence, sterols, ATPase, 3
Plasma membrane, mechanical stress, microsomes, calcium transport, calmodulin, tonoplast, 23
Plasmid-like DNAs, mitochondrial DNA, *Lupinus albus*, hairpin structures, 173
Polyamines, *Lens culinaris*, germination, plant stress, 51
Potassium, *Cucumis sativus* L., *Phaseolus radiatus* L., *Phaseolus vulgaris* L., adventitious root formation, 47
Proline, *Agrostis alba* L., embryogenic callus, thioproline, 259
Promoter activity, T-DNA, *Agrobacterium rhizogenes*, root-inducing genes, organ-specific expression, 69
Protein kinase, *Petunia hybrida*, 3′,5′-cyclic AMP, Ca^{2+}, 37
Protoplasts, chitosan, plant viruses, plant protection, 63
Protoplast fusion, cytoplasts, cybrids, *Brassicaceae*, 205

Regeneration, auxin, *Brassica napus*, cytokinins, genic male sterility, 95
Regeneration, somatic embryogenesis, alfalfa, *Medicago*, citric acid, 181
Respiration rate, vitamin B_{12}, *Euglena*, O_2 uptake, 143
Ribonucleotide reductase, *Euglena*, enzyme accumulation, vitamin B_{12}, 149
Rice, coleoptiles, anoxia, ethylene, growth regulators, 57
Root-inducing genes, T-DNA, *Agrobacterium rhizogenes*, promoter activity, organ-specific expression, 69
Root membrane, H^+-ATPase, sunflower, *Helianthus annuus*, mRNA assays, 163
Rosmarinus officinalis, inorganic salts, cytokinin efficacy, shoot bud differentiation, 229

Seed germination, fumarase development, fumarase purification, lipid-storing seeds, mitochondrial biogenesis, starch-storing seeds, 137
Senescence, *Avena sativa*, plasma membrane, sterols, ATPase, 3
Shoot bud differentiation, *Rosmarinus officinalis*, inorganic salts, cytokinin efficacy, 229
Silicon carbide fiber, *Agrostis alba*, DNA delivery, electroporation, wheat dwarf virus-derived plasmid, β-glucuronidase, 247
Solanum melongena, mutagenesis, EMS gamma rays, lincomycin, 237
Somatic embryo, transformation, *Medicago sativa*, glucuronidase, 223
Somatic embryogenesis, alfalfa, regeneration, *Medicago*, citric acid, 181
Somatic embryogenesis, cell culture, histology, *Lycium chinensis*, 99
Somatic hybrid, auxotrophy, cell culture, *Datura*, kanamycin resistance, universal hybridizer, 111
Soybean, photosynthesis, nitrogenase activity, sulphur dioxide, molybdenum, 157
Starch-storing seeds, fumarase development, fumarase purification, lipid-storing seeds, mitochondrial biogenesis, seed germination, 137
Sterols, *Avena sativa*, plasma membrane, senescence, ATPase, 3
Stress response, sunflower, *Helianthus annuus*, ubiquitin, transient expression, 87
Successive culture, *Cuscuta japonica*, flowering, haustorium, kinetin, 241
Sulfonylurea, in vitro selection, mutant, herbicide resistance, acetohydroxyacid synthase, adventitious bud regeneration, 77
Sulphur dioxide, soybean, photosynthesis, nitrogenase activity, molybdenum, 157
Sunflower, *Helianthus annuus*, ubiquitin, transient expression, stress response, 87
Sunflower, root membrane, H^+-ATPase, *Helianthus annuus*, mRNA assays, 163

T-DNA, *Agrobacterium rhizogenes*, root-inducing genes, promoter activity, organ-specific expression, 69
Tecomella undulata, clonal propagation, desert teak, plantlet, tissue culture, 217
Thioproline, *Agrostis alba* L., embryogenic callus, proline, 259
Tissue culture, clonal propagation, desert teak, plantlet, *Tecomella undulata*, 217
Tissue culture medium, *Arabidopsis thaliana*, light, *Lycopersicon esculentum*, *Daucus carota*, 253
Tonoplast, mechanical stress, microsomes, calcium transport, calmodulin, plasma membrane, 23
Transformation, somatic embryo, *Medicago sativa*, glucuronidase, 223
Transient expression, sunflower, *Helianthus annuus*, ubiquitin, stress response, 87
Triacontanol, auxin, NADH oxidase, plant growth, 31

Ubiquitin, sunflower, Helianthus annuus, transient expression, stress response, 87
Universal hybridizer, auxotrophy, cell culture, *Datura*, kanamycin resistance, somatic hybrid, 111

Vitamin B_{12}, respiration rate, *Euglena*, O_2 uptake, 143
Vitamin B_{12}, ribonucleotide reductase, *Euglena*, enzyme accumulation, 149

Wheat dwarf virus-derived plasmid, *Agrostis alba*, DNA delivery, electroporation, silicon carbide fiber, β-glucuronidase, 247
